Executive Assessment

The evaluated AI application demonstrates good overall quality with only minor improvement opportunities. The framework recommends deployment after addressing the identified REVIEW and FAIL scenarios.

Evaluation Summary

Metric	Value
Total Questions	25
PASS	18
REVIEW	5
FAIL	2
Overall Score	89.2%
Average Confidence	90.4%
Average Latency	402.2 ms

Strengths

- High percentage of successful evaluations.
- High response confidence across evaluated questions.
- Good response latency for evaluated scenarios.

- Configuration-driven and reusable evaluation framework.

Improvement Opportunities

- Review medium-confidence responses to improve answer quality.
- Investigate failed scenarios and enhance the knowledge base.
- Expand the Golden Dataset with additional edge-case scenarios.

Recommendations

- Recommended for User Acceptance Testing (UAT).
- Continue monitoring confidence and latency metrics.
- Re-run the evaluation after knowledge base or prompt updates.
